

Project Descriptions for March 7, 2018

Board of Trustees Meeting

Clean Water Agreements

Revere CWP-16-17

The Phase VII Construction Project will include the removal of inflow/infiltration (I/I) from the City's system. Construction will include the redirection of public and private inflow sources discovered during the Phase VI investigations, Illicit Discharge Detection and Elimination (IDDE) source removal, and drainage improvements. Construction will also include pump station improvements (both wastewater and stormwater), cured in place pipe lining, sewer spot repairs, new sewer lines, sewer cleaning and additional wastewater metering.
